

EXHIBIT "A"

The following is a list of minimum equipment requirements to raise said broilers in growing facility. All equipment to be maintained and working properly at all times.

- 1) Two feed bins per house (operable and minimum of two thousand (2,000) pounds per one thousand (1,000) birds placed);*
- 2) Automatic pan-auger feeders sufficient for all birds in growing facility;*
- 3) A minimum of four (4) eight foot (8') automatic water troughs per one thousand (1,000) birds in the growing facility or as specified by reputable manufacturer for any approved dry cup water or nipple system by ConAgra;*
- 4) Minimum of one (1) jet-type, 36,000 BTU brooder for each seven hundred-fifty (750) birds with two-thirds (2/3) in brooding end if one-half (1/2) house brooding. Sidewall heaters to be approved by broiler manager.*
- 5) Minimum of one (1) feeder lid and one (1) chick fountain for each one hundred (100) chicks in growing facility, working properly and down for recommended time of poultry service technician, unless approved paper feeding by service technician.*
- 6) A fogger and fan system ("Auburn" fogger nozzle system or equivalent), sufficient according to manufacturer's recommendations to service the growing facility with maximum density.*
- 7) Insulation must be maintained in good condition and meet ConAgra requirements.*
